Joshua Parker is an architect and researcher specializing in computational design and interaction. He is currently a senior designer at Aedas and founder of SML, a multi-disciplinary consulting practice in Beijing.

Joshua received an M.Arch degree from Syracuse University School of Architecture (SUSOA). Prior to that, he studied Electrical Engineering and Computer Science at the University of Washington and was recipient of the Outstanding Capstone Project award for his work in embedded computation. He has also participated in international workshops, most recently at the Institute for advanced architecture of Catalonia (IaaC), where he worked on the NetworkedCITY project, an installation that combines physical computing, data visualization and real time computation.
